

palm

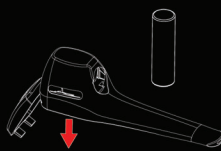

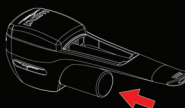

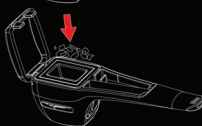

product of vaporBLUNT

Instructions for use

thevaporblunt.com

Palm instructions:

1. Insert mouth tip into Palm body.
2. Finely grind and load your product on to screen. Do not over pack as damage to the screen may occur.
3. Close lid, insert charged NiMH battery and firmly press to start heating.
4. The glowing lamp will indicate power flow. As vapor forms, draw off. A slow draw will be hotter than a fast draw.
5. Release battery pressure while drawing to finish. This will cool the unit and evacuate all vapor.
6. Fully vaporized product will be brown. Stir product as needed.
7. Remove battery, empty used product, brush screen and clean glass tube after use.

Screen Replacement:

- Screen is not intended for repeated removal.
- The screen will be damaged once removed.
- Replaceable screens are available for purchase separately.
- For easy replacement, use tweezers (not included) to remove screen.
